ABSTRACT

In this paper, we describe the formatting guidelines for ACM SIG Proceedings.

Keywords

Keywords are your own designated keywords separated by semicolons (";").

1. INTRODUCTION

The proceedings are the records of the conference. ACM hopes to give these conference by-products a single, high-quality appearance. To do this, we ask that authors follow some simple guidelines. In essence, we ask you to make your paper look exactly like this document. The easiest way to do this is simply to download a template from [2], and replace the content with your own material.

2. ARCHITECTURE

3. IMPLEMENTATION

The heading of a section should be in Times New Roman 12-point bold in all-capitals flush left with an additional 6-points of white space above the section head. Sections and subsequent sub-sections should be numbered and flush left. For a section head and a subsection head together (such as Section 3 and subsection 3.1), use no additional space above the subsection head.

3.1 BIBFRAME

The heading of subsections should be in Times New Roman 12-point bold with only the initial letters capitalized. (Note: For subsections and subsubsections, a word like *the* or *a* is not capitalized unless it is the first word of the header.)

3.1.1 WORK

The heading for subsubsections should be in Times New Roman 11-point italic with initial letters capitalized and 6-points of white space above the subsubsection head.

3.1.2 INSTANCE

The heading for subsubsections should be in Times New Roman 11-point italic with initial letters capitalized.

3.1.3 ITEM

The heading for subsubsections should be in Times New Roman 11-point italic with initial letters capitalized.

3.2 FUSEKI

The heading of subsections should be in Times New Roman 12-point bold with only the initial letters capitalized. (Note: For subsections and subsubsections, a word like *the* or *a* is not capitalized unless it is the first word of the header.)

3.2.1 INSTALLATION

The heading for subsubsections should be in Times New Roman 11-point italic with initial letters capitalized and 6-points of white space above the subsubsection head.

3.2.2 SPARQL

The heading for subsubsections should be in Times New Roman 11-point italic with initial letters capitalized.

3.2.3 HTTP ENDPOINT

The heading for subsubsections should be in Times New Roman 11-point italic with initial letters capitalized.

3.3 WEBPAGE

The heading of subsections should be in Times New Roman 12-point bold with only the initial letters capitalized. (Note: For subsections and subsubsections, a word like *the* or *a* is not capitalized unless it is the first word of the header.)

3.3.1 JAVASCRIPT

The heading for subsubsections should be in Times New Roman 11-point italic with initial letters capitalized and 6-points of white space above the subsubsection head.

3.3.2 BOOTSTRAP

4. EVALUATION

5. CONCLUSIONS

6. FUTURE WORK

7. ACKNOWLEDGMENTS

Our thanks to ACM SIGCHI for allowing us to modify templates they had developed.
